

Miracle Berry

Scientific Name: *Synsepalum dulcificum*

Origin: Exotic, Native to tropical west Africa

This attractive evergreen shrub has fragrant flowers and bright red fruit used as sweetener with antioxidant properties. The berry contains miraculin, which naturally alters taste buds temporarily, making sour foods taste sweet! Great for a lanai or indoors- it will grow to only 5' in a pot. Not suitable for pregnant or breastfeeding women. Growth is slow but they begin to fruit at one foot in height. Keep soil moist. The plants are from the rain forests of west Africa and they prefer hot and humid.

Partial Shade

Abundant Water

Acidic/Well Drained Soil

Slow Growth

White Flower

Height: 4'-10'

Width: 3'-6'

Edible
